RELEVANT PROJECTS

SharePoint team site for the Division of Tax and Audit Enforcement at NYC Department of Finance, using which the employees of the division are able to collaborate and share documents, use dashboard and calendar, modify or change the documents as per their access rights, watch training and conference videos, and download different forms.

The Art Effects (Marist College): We, as a team of 4 members, implemented a web-based project for a fictitious home décor store called the Art Effects. We developed a fully functional website using ASP.NET with C# as code-behind language using three- tier architecture. The database for the same was created in SQL Server and hosted on the cloud. My role in this project was that of software and database developer.

Health Care Solution and **Patient Health Card Management System**, both Windows applications implemented in C#.NET with SQL Server used for databases, during my tenure as Software Developer at **Maverick Software (India) Pvt. Ltd.**

Web-based projects: Developed http://mindventures.in/, http://srespune.org/, http://www.saisneh.com **and few modules of** http://medicohelpline.com/, http://pipadafurnitures.com/, http://www.sharpconsultancy.in
